

Catch Fraud Free for 30 Days

Catch forgery and deepfakes before a closing is compromised.

How to try Defend

Getting started takes one conversation. Here's what a pilot looks like.

Step 01

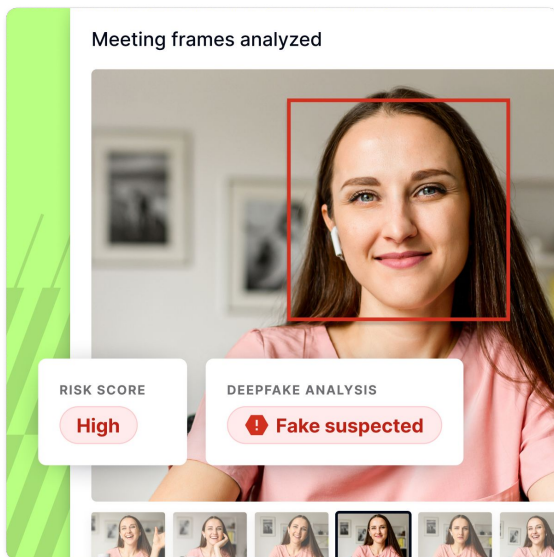

Talk to our team about your transaction volume and where fraud shows up in your closing process today. No commitment required for the conversation.

Step 02

We set up a 30-day Defend pilot alongside your Proof onboarding, at no extra cost, running on your real transactions from day one.

Step 03

Start using Defend and watching fraud detection at work.

Industry-leading fraud detection

6x

More fraud caught than a leading industry benchmark model

13x

Better operational efficiency at the same detection rate

<1

Basis point at a 2.25% intervention rate

Fraud is hitting closings unlike ever before

Real estate fraud is accelerating, and Defend covers every angle without slowing down your closings.

Forgery detection

Impersonation checks

Deepfake detection

Explainable AI

Risk-based monitoring

Self-serve dashboard

Trial terms

Defend runs underneath the signing and notarization workflow Proof already provides. It won't add steps for your signers, only a review step for your team.

Your pilot runs free for 30 days once your account and Defend are set up together, evaluated on your own transactions. If you decide to move forward afterward, our team puts together a new contract to bring Defend onto your account.

Support

The Proof platform and the Notarize Network are operational 24 hours a day, every day of the year. Our support team is available:

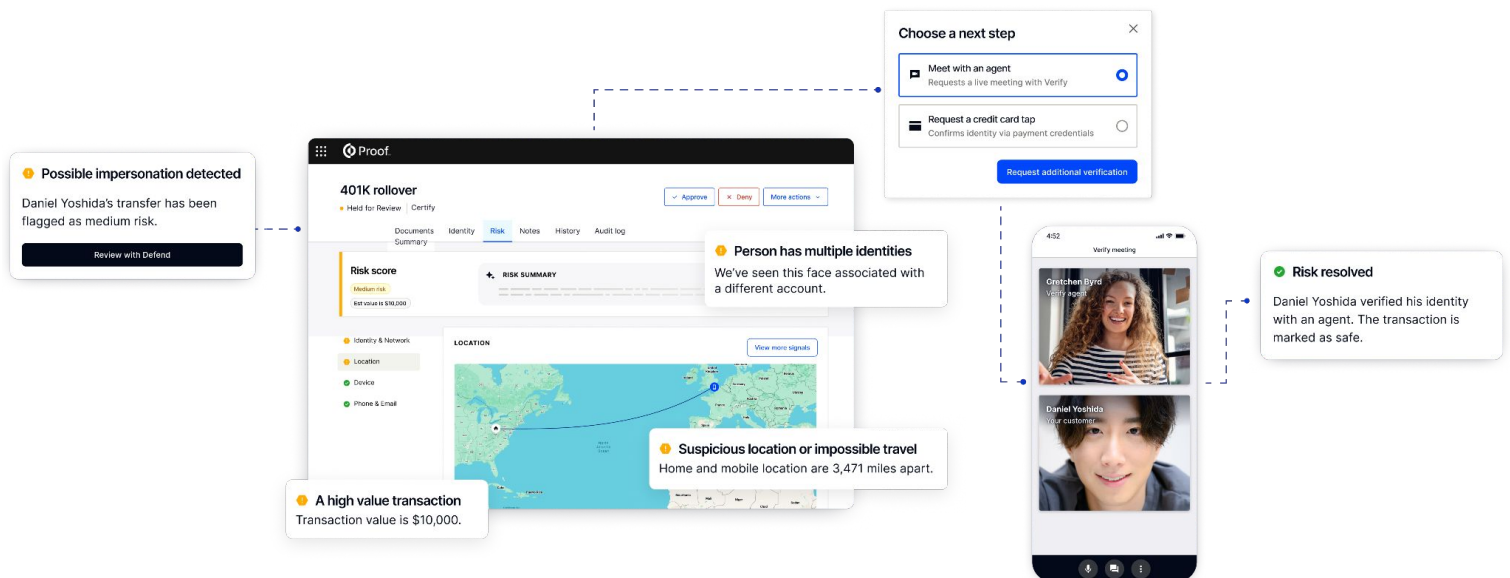

Monday – Friday: 8 am – 10 pm ET
Saturday & Sunday: 8 am – 7 pm ET
